**Lets Make Sustainability a Necessity of Packaging**

## About us

After serving the industry and gaining the customer trust for more than 12 years , We at brother packaging started at 2020 with the mission of **Committed to transforming into a green youth organization.**

- Packaging – PP corrugated boxes, Export Packaging, wooden boxes, Steel trolley.
- Fabrication – Heavy duty fabrication work.
- Manpower supply through brothers enterprises– Pharma Industry, Heavy Engineering, Textiles Industries - Onboard 300 manpower effective right now.

### Key Objective as a team focused.

- To own social responsibility and reduce carbon footprint by reducing energy consumption with the use of energy-efficient components.
- Reducing the overall weight of shipping by 35%; means lesser transport fuel consumption & reduced freight costs.
- Design innovative solutions that lead to conserving resources by delivering, efficient packing, lightweight packs.
- Product and End-user safety, time Packaging unpacking.
- Easy to use end to end considering an inbound Out bond.
- We Will ensure our customers get more material per Kg or CM.  
So, if you have a product filled in a container no matter what shape or size, our team will ensure you to get the best solution.

**Specialties:** PP corrugated box, Foam fitments', Palletization, Truck Optimization, Steel trolley for internal material handling. customized fabrication work.

## Vision

### *Working to ward a green organization*

**Committed to transforming into a green youth organization.** The vision is to embed sustainability and environmental protection into the core and fundamental value in YOUTH through development of Go Green footprint in every solutions. At the same time, we aim to build up a role model to influence India youth to use the go green packaging solutions.

## Mission of Achievement

### *To become a green youth organization:*

We will be committed to protect our natural environment by reducing carbon emissions. We improve the green operations by implementing different environmental measures through packaging

### *To implant green "DNA" into our core services:*

We deliver the youth services and education activities in environmental friendly manner. We also encourage our team & customer to put the green elements in designing their packaging for influencing staff and youth to go green.

### *To train the trainers:*

We enhance front-line staff's environmental awareness and understanding by providing them necessary environmental training. We also encourage them to bring these green messages to our youth and the community.

### *To cultivate and educate a generation of green youth:*

We provide various environmental activities for youth to build up their environmental awareness and the necessary environmental knowledge.

## Quality Policy

Exceed customer expectation by providing zero defect products on time at competitive prices to achieve customer delight, Also holistic approach wherein we provide value to all stack holder suggestions and agreed specification.

## We believe in

# 7 "R'S OF SUSTAINABILITY THAT YOU CAN EASILY FOLLOW

### REMOVE

Eliminate unnecessary materials and packaging, as well as the Actively participate in the removal of pellets from the environment through the Operation Clean Sweep program.

### REDUCE

Downsize or optimize products where possible, focusing on freight optimization and energy efficiency.

### REUSE

Reuse Available materials & packaging, and implement Packaging Exchange programs for skids, cores, cradles, boxes, and other similar materials.

### RECYCLE

Pelletize all possible materials in-house for reuse, use recycled content products and packaging, implemented a company-sponsored Recycle Program.

### RENEW

Use materials/packaging from renewable resources (non-petroleum based) when possible. We also use alternative, more environmentally-friendly materials, packaging, and energy when possible.

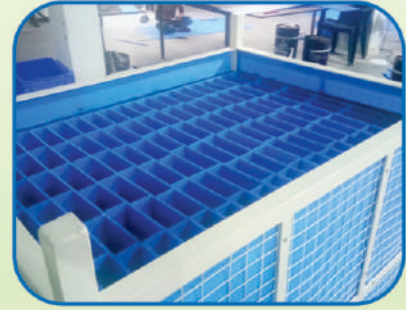

### REVENUE

Achieve goals at a cost savings or, at minimum cost neutral.

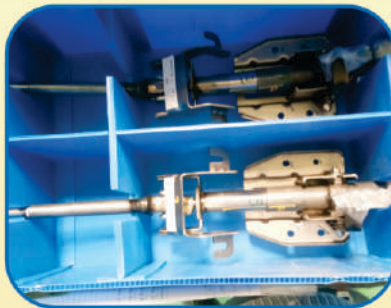

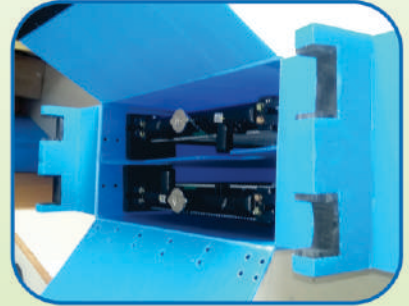

### READ

Continue to learn about new technologies, methods, and materials that adhere to the standards of sustainability. with innovation driving rapid change, McNeely is aware of how critical it is to continually seek to educate ourselves about new innovation.
